

## Reporting & Business Intelligence

Data Plus has partnered with Cyberscience, a provider of business intelligence software, to offer you Cyberquery, a Business Intelligence component that works directly with the Data Plus database.

Cyberquery is the fastest and most powerful Reporting and Business Intelligence solution available today. Delivered through an easy-to-use Web interface and client/server implementation, Cyberquery delivers business intelligence in graphs, reports and spreadsheets, distributed by email, paper and over the web. Users may subscribe, unsubscribe or conditionally subscribe to information as they require. Subscriptions enable your key personnel to receive critical information using their email or mobile device, when they need it and in the format of their choice.

Easily export information directly into Excel and other spreadsheets for further analysis and presentation. Receiving information so quickly and easily makes it possible for you and your staff to respond promptly, and in turn improve profitability and customer service.

## Data Plus Customers are using Cyberquery

*Black Butte Ranch has started using Cyberquery and seen many opportunities to improve our reporting. We have more ideas than time for different reports that would be useful.*

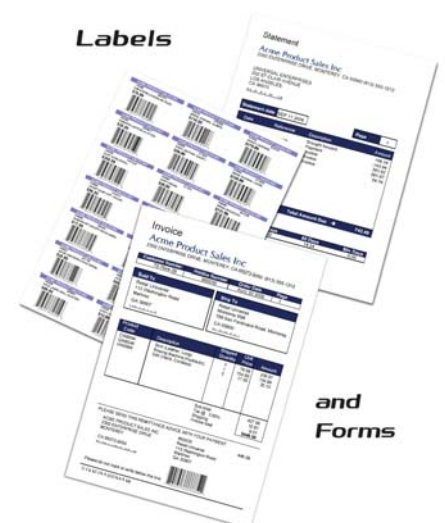

*One report we are using is one that pulls all food and beverage department cost of sales and then summarizes the department cost of sales. We also use a daily revenue account list on a regular basis that helps us track new accounts. Our reports are much more professional looking and have received good marks from our Board.*

*Cyberquery will be especially useful as we move into our budget cycle this fall and we will be able to export our reports to excel.*

*Sharon Dilley, CFO  
Black Butte Ranch*

## Cyberquery's Unique Benefits

- a Supports databases of any size
- a Data dictionary fully describes the DPHS database structure

# Easy to Use Windows-Style Formatting

Screen shot of Visual Report creator/developer tool.  
Easily 'drag and drop' fields from Data Plus into Report:

The screenshot shows the Visual Report creator/developer tool interface. On the left, there is a 'Show:' panel with a tree view of data fields under 'Avendor'. The main area displays a report titled 'VENDOR LIST' with the DPHS logo. The report contains a table with columns: Vendor Number, Vendor Alpha, Vendor Name, Address, and City. The table lists 16 vendors, including 'Health Insurance Company', 'LANDSCAPE COMPANY', and 'WorldWide Travel'.

**Highlight Key Data**  
**Add Your Logo**  
**Drag & Drop Data Repositioning**  
**Customize a Standard Layout**  
**Export to a Polished Excel Spreadsheet**

Create all types of charts and graphs with the developer tool:
